Robo-Fest 2010 : Walk-In Try-It Opportunities

Sunday, October 24

## Robo-Soccer Skill

### Enjoy the World Cup?

- If you attended any FIRST Robotics Competitions last year, you saw robots kicking soccer balls around a team full of obstacles and goals.
- The team members did a great job of controlling those robots. Would you like a turn? Think you're pretty good?
- Simply visit our Soccer Skill area and meet one of the FRC robots. Our volunteers will quickly train you and introduce you to the "Robo-Fest Soccer Skill" challenge.
- Can you score 100 points in two minutes by hitting all of the goals? It is not as easy as it looks. Come on over and give it a try!
- While there, learn about all of the FIRST programs and how you can join or start a real FIRST team.

*Suggested Ages: 13 to 18*
